## **English**

## **English**

At St Breward, English is at the heart of the curriculum planning. The interlinked skills of reading and writing are taught in tandem to ensure our pupils can transfer skills and knowledge easily and apply them across the curriculum with confidence. The teaching and modelling of Speaking and Listening skills support this and ensures our children can be good communicators. We use high quality, language rich texts, selected to ensure pupils are exposed to a variety of text types and authors linked to our topic based curriculum. The texts selected allow pupils to develop their enjoyment of reading and develop a wide vocabulary. We strive to ensure that all our pupils receive a well-rounded learning experience when reading, writing, speaking and listening which will equip them with the fundamental tools to achieve at St Breward and beyond.

## **Maths**

At St Breward we believe the language, knowledge, skills and understanding that children gain through mathematics will ensure that they are well prepared for the future and are ready for their working life. Maths is about learning new skills and practising these to become fluent so as to be able to apply them in real life situations. It is important to us that children see the relevance of maths and why it is needed in life. We set our children's learning in context by making links to real life, and across the curriculum, giving their learning worth. Our daily maths lessons provide rich activities that are challenging, purposeful, reflective and provide opportunities for our pupils to talk and develop their mathematical language, using a range of visual and concrete resources.
